Nikola, just saw another article calling AC "the future." Cute theory. Real cities use systems that work.

Nikola Tesla - Jan 25, 2026 at 12:27 PM

Define "work." ⚡ Because my system lights cities without catching fire.

Thomas Edison - Jan 25, 2026 at 12:28 PM

People like simple. DC is straightforward. Reliable. Safe.

Nikola Tesla - Jan 25, 2026 at 12:28 PM

"Safe" is doing a lot of work in that sentence buddy 😏

Thomas Edison - Jan 25, 2026 at 12:29 PM

Lmao 😂, you're just mad because investors prefer results over ideas.

Nikola Tesla - Jan 25, 2026 at 12:29 PM

Funny. My ideas are still in use. Your wiring diagrams belong in a museum.

Nikola Tesla - Jan 25, 2026 at 12:30 PM

Niagara Falls. Powered by AC. Still running. Still impressive.

Okay but check this out.

Thomas Edison - Jan 25, 2026 at 12:31 PM

This built an empire.

You always act like you invented electricity itself.

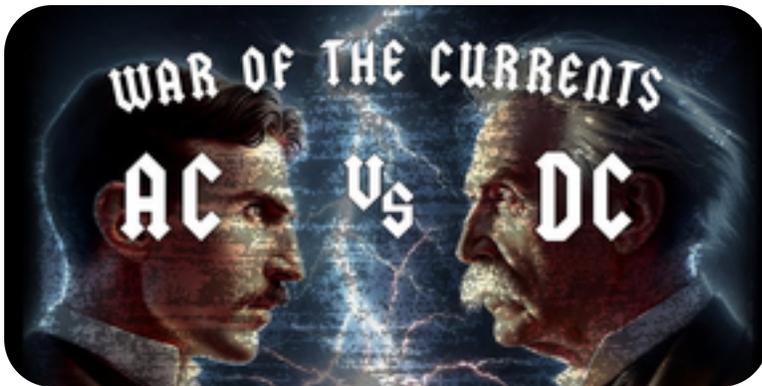

Nikola Tesla - Jan 25, 2026 at 12:33 PM

No. I just figured out how to send it more than a few blocks 🗑️

Wikipedia? Anyone can edit that.

Nikola Tesla - Jan 25, 2026 at 12:34 PM

True. Yet somehow it still says AC won. ⚡😏

Thomas Edison - Jan 25, 2026 at 12:34 PM

Let's be honest. I only pushed DC because I already invested millions in it.

Nikola Tesla - Jan 25, 2026 at 12:35 PM

...You might not want that in writing. Too late hah.

Thomas Edison - Jan 25, 2026 at 12:35 PM

What? It's called business.

Nikola Tesla - Jan 25, 2026 at 12:35 PM

It's called intentional promotion of inferior technology for profit.

Nikola Tesla - Jan 25, 2026 at 12:38 PM

AC in action. Still powering cities. No spin required.

Thomas Edison - Jan 25, 2026 at 12:39 PM

But I still got my name on more light bulbs.

Nikola Tesla - Jan 25, 2026 at 12:39 PM

True. I'll take the power grid.

Thomas Edison - Jan 25, 2026 at 12:40 PM

...let's settle this out of court.
